Madam/Sir

Sub: Sensitization programme on "Fintech" from 08th to 10th January 2020

Greetings from VAMNICOM, Pune, India!

Fast paced innovation in Financial Technology (Fintech) is radically changing the banking landscape.

Banking & Financial Sector of India and the developing countries is witnessing many changes at unprecedented pace with respect to technology and its application. This has led to the emergence of a new sector called Financial Technology – popularly known as "**Fintech**". We are witnessing a Fintech revolution and people all over – urban as well as rural -have started embracing digitalization in some form of the other.

Global Fintech software and services sector is expected to grow to USD 45 billion by 2020 and entails huge training investment in Fintech and Digital banking. The FinTech sector was also a topic of discussion in Union budget 2017, highlighting its significance and probable regulations that may be underlined in the times to come.

All the banks especially the new age Payments and Small Finance Banks and the MFI, NBFC, P2P platforms and other related organizations have huge opportunities in Fintech for use in survival and expansion of their businesses.

All these developments have resulted in a lot of investments being made in this sector. Today, India is listed as a nation with highest expected ROI of 29% on FinTechs. (Source: PWC, 2017).

What is FINTECH?

At the core, Fintech is basically use of technology for improved access and usage of financial services that range from payments and remittances, lending, saving, borrowing, investing and so on. Fintech firms are poised to fragment the finance industry by making these services more efficient, convenient, cost effective, transparent and accessible.

Therefore, this segment, although nascent, has become an integral part of the Banking & Financial Sector. The intersection of payments and banking, digitalization of banking services, business analytics, block chain, P2P lending and cryptocurrency have presented opportunities as well as challenges before us.

The Fintech revolution has picked up fast pace due to rising interest and fascination towards start-up culture, rising digital payments systems, expanding mobile reach, soaring demands of easy banking, regulatory requirements of financial markets, more demand for financial products, services and knowledge, innovations in the financial services sector and ever rising concerns on Financial Inclusion.

In the above context, there is a greater need to develop a better understanding of the Fintech sector and how banks, NBFCs, MFIs and other related businesses can collaborate with various stakeholders to solve their business problems and push the current boundaries of innovation and growth.

Programme for whom?

The programme entitled "Sensitization programme on Fintech" has been especially designed in collaboration with **Mr Dewang Neralla, CEO, 'Atom Technologies'**- a pioneer in Fintech in India and **Prof Dr Amarendra Sahoo, Chairman, 'Atom Technologies' & Professor, SRM University**. It will be of immense importance at a time when technological developments are picking up at an unprecedented pace. It will be beneficial not only for the staff dealing with IT in banks (commercial as well as cooperative banks) as well as senior officers in general, because fintech creates an impact on every single activity of the banks as they leverage technologies to attain the goals of financial inclusion, better customer satisfaction, alternative forms of lending and credit appraisal, digital banking and the like. Besides banks, the programme will be of immediate use to Microfinance Institutions (MFIs), Non-Banking Finance Companies (NBFCs), and other related organisations.

Objectives of the programme:

The broad objectives of the programme are as below :

- 1.To sensitize and apprise the bank officials on "Fintech" and its present status in India
- 2.To understand the applications of Fintech in Banking and other financial services industries.
3. To share good case studies on Fintech collaboration and Innovation
4. To understand the role of Fintech in Financial Inclusion.

Contents and coverage of the programme:

1. Fintech Revolution in India- Basic Understanding of Concepts & Implications for banking and other financial services industries
2. Digital Wallets, Mobile banking and Internet Banking
3. Role of FinTech in Financial Inclusion and Financial Integration
4. Understanding UPI (Unified Payment Interface)
5. Customer Intelligence, Business Intelligence and Use of Data Analytics
6. .Blockchain
7. Fintech Applications & Case Studies
8. Cyber security and Regulatory challenges
